

Contents

Section 1: Introduction

-
- 1. Cataract Etiology** 3
David Meyer, Paul Liebenberg
Introduction 3, Congenital and Infantile Cataract 3, Age-related Cataract 6
- 2. Biochemistry of the Lens** 31
Ashok Garg
Introduction 31, Biochemistry of the Lens 31, Crystalline Lens as an Osmometer 31, Lens Proteins 31, Active Transport Processes 32, Amino Acids 33, Lipids 34, Ascorbic Acid 34, Glucose Metabolism 34, Applied Physiology 35, Biochemistry of Cortical Cataracts 35, Nuclear Sclerosis 36
- 3. History of Phacoemulsification** 37
Charles D Kelman
Introduction 37, Surgical Problems 39, Instrument Problems 40, Heat Build-up 40, Political Problems 42
- 4. Intraocular Lens Power Calculations** 43
Li Wang, Douglas D Koch
Introduction 43, Axial Length Measurement 43, Ultrasound 43, Optical Coherence Biometry 44, Keratometry 44, Anterior Chamber Depth Measurement 45, Intraocular Lens Calculation Formulas 45, Intraocular Lens Power Calculation following Corneal Refractive Surgery 46, IOL Power Calculation in Post-LASIK/PRK Eyes 47, Web-based IOL Power Calculation 49
- 5. IOL Power Calculation in Complex Cases** 53
Benjamin F Boyd, L Samuel Boyd, Luis W Lu
Introduction 53, Specific Methods to Use in Complex Cases 53, Method for Choosing Formulas Based upon the Axial Length 53, High Hyperopia 54, Determining IOL Power in Patients with Previous Refractive Surgery 56, Commonly Used Methods 56, IOL Power Calculation in Pediatric Cataracts 58, IOL Power Calculation Following Vitrectomy 59
- 6. IOLMaster for Determining the IOL Power at the Time of Surgery** 62
Hampton Roy, Warren E Hill
Introduction 62, Modes 62, New Intraocular Lens Constants 63, Advantages 63, Disadvantages 63
- 7. Corneal Topography in Cataract Surgery** 65
Athiya Agarwal, Amar Agarwal
Introduction 65, Cornea 65, Keratometry 65, Keratoscopy 66, Computerized Videokeratography 66, Normal Cornea 67, Cataract Surgery 69, Extracapsular Cataract Extraction 69, Phakonit 70

Section 2: Instrumentation, Medication and Machines

-
- 8. The Phaco Machine: How It Acts and Reacts** 75
William J Fishkind
Introduction 75, Power Generation 75, Energy at the Phaco Tip 75

9. The Fluidics and Physics of Phaco	84
<i>Barry S Seibel</i>	
<i>Introduction 84, Categorization of Pumps 84, Flow Pump 84, Application of Ultrasound Power 88, Adjustment of Machine Parameters 88</i>	
10. Air Pump and Gas-Forced Infusion	92
<i>Smita Narasimhan, Amar Agarwal</i>	
<i>History 92, Introduction 92, Air Pump 92, Technique 92, Topical or No Anesthesia Cataract Surgery 93, Internal Gas-Forced Infusion 93, Air Pump-assisted Phaco for Managing Cases with Incomplete Rhexis 94</i>	
11. Torsional Phacoemulsification	98
<i>Sunil Thadani, Bonnie An Henderson</i>	
<i>Background and Introduction 98, Heat Production 98, Tip Travel 98, Comparisons of Torsional and Longitudinal Ultrasound Systems 99, Ultrasound Time and Energy Dissipation 100, Corneal Edema and Endothelial Cell Count 100, Visual Acuity 100</i>	
12. Viscoelastics and Ophthalmic Viscosurgical Devices (OVDs) in Ophthalmic Surgery	102
<i>Guillermo L Simón-Castellví, Sarabel Simón-Castellví, José María Simón-Castellví</i>	
<i>José María Simón-Tor, Esteban Pertejo-Fernández</i>	
<i>Introduction 102, Use of Ophthalmic Viscosurgical Devices in the Operating Theater 102, Indications of OVDs 103</i>	
13. Local Anesthetic Agents	117
<i>Ashok Garg</i>	
<i>Introduction 117, Local Anesthetics (Injectables) 117, Esters 118, Amides 119, Local Anesthetics (Topical) 120</i>	
14. Anesthesia in Cataract Surgery	124
<i>Ashok Garg</i>	
<i>Introduction 124, Anesthesia for Cataract Surgery 124, Method of Anesthesia 125, Complications of General Anesthesia 126, Complications of Retrobulbar Injection 130, Peribulbar (Periocular) Technique 131, Topical Anesthesia 133, How to Achieve Surface Anesthesia for Intraocular Surgery 134, Can One Convert Half Way Through Surgery Under Topical Anesthesia 134, No Anesthesia Cataract Surgery 135</i>	
15. Ocular Anesthesia for Small Incision Cataract Surgery	136
<i>Samuel Masket</i>	
<i>Introduction 136, Methods 138</i>	

Section 3: Phaco Steps

16. Preparing for the Transition to Phacoemulsification	143
<i>L Samuel Boyd, Benjamin F Boyd, Cristela F Aleman</i>	
<i>Introduction 143, Main Elements of Phaco Machines 143, Surgical Techniques in the Transition 143, Anesthesia 143, The Mechanism of the Phaco Machine 146, Optimal Use of the Phaco Machine 146, Nucleus Removal and Application of Phaco 149, Fracture and Emulsification 149, Intraocular Lens Implantation 151, Enlarging the Incision and Implanting the Lens 151, Removal of Viscoelastic 151</i>	
17. Incisions	153
<i>Luis W Lu, Alejandro Espallat, Ana Claudia Arenas, Francisco Contreras-Campos</i>	
<i>Introduction 153, The Limbal Incision 153, The Scleral Incision 154, The Clear Corneal Incisions 154, Location 154, The Side Port Incision 156, Relaxing Incisions 156</i>	

18. Capsulorhexis	158
<i>Tobias Neuhann</i>	
<i>History 158, Needle Technique 158, Forceps Technique 159, The Two-step Needle Technique 160, Difficult Cases 161, Small Pupil 161, Pseudoexfoliation Syndrome, Uveitis and Pigmentosa 161, Complications and Pitfalls 162, Discontinuity of the Capsulorhexis 162, Captured Viscoelastics 163, Disadvantages of the CCC 163</i>	
19. Divide and Conquer Nucleofractis Techniques	166
<i>Howard V Gimbel, Ellen Anderson Penno</i>	
<i>Introduction 166, Down-slope Sculpting 166, The Fracture 169, Phaco Sweep 171, Crater Divide and Conquer (CDC) Technique 171, Trench Divide and Conquer (TDC) Technique 172, Multidirectional Divide and Conquer (MDC) Technique 172, Phaco Chop 173, Polar Expeditions 174, The Small Pupil 174, Intumescent Lens 175, Capsular Tension Rings 175, Challenges to Topical Anesthesia in Small-incision Cataract Surgery 175</i>	
20. Stop and Chop Phacoemulsification	178
<i>Amar Agarwal, Soosan Jacob</i>	
<i>Introduction 178, Surgical Technique 178, Preliminary Steps 178, Complications 179</i>	
21. Phaco Chop Techniques	181
<i>Uday Devgan</i>	
<i>Phaco Chop 181, Occlusion 181, Horizontal Chopping 181, Vertical Chopping 181, Tilt And Chop 181</i>	
22. No Anesthesia Cataract Surgery with the Karate Chop Technique	182
<i>Athiya Agarwal, Sunita Agarwal, Amar Agarwal</i>	
<i>Introduction 182, Nucleus Removal Techniques 182, Karate Chop 182, Soft Cataracts 182, Agarwal Chopper 182, Karate Chop Technique 182, Incision 182</i>	
23. Supracapsular Phacoemulsification	189
<i>Amar Agarwal, Soosan Jacob</i>	
<i>Introduction 189, Surgical Technique 189, Preliminary Steps 189, Complications 190</i>	
24. Hydrodissection and Hydrodelineation	192
<i>I Howard Fine, Richard S Hoffman, Mark Packer</i>	
<i>Hydrodissection 192, Hydrodelineation 192, Cortical Clean-up 194, Take Home Pearls 194, Core Message 194</i>	

Section 4: MICS/Phakonit

25. History of Microincision Cataract Surgery (MICS): From Phakonit to Microphakonit	199
<i>Amar Agarwal</i>	
<i>Introduction 199, MICS IOLs 201</i>	
26. Wound Architecture in Microincision Cataract Surgery and In Vivo Analysis of 700 Micron Cataract Surgery	206
<i>Dhivya Ashok Kumar, Amar Agarwal</i>	
<i>Introduction 206</i>	
27. Phakonit	212
<i>Amar Agarwal, Athiya Agarwal, Sunita Agarwal</i>	
<i>History 212, Principle 212, Terminology 212, Synonyms 212, Technique of Phakonit for Cataracts 212, Antichamber Collapser 214, Thinoptx Rollable IOL 216, Lens Insertion Technique 216, Roller 217, Topography 217, Laser Phakonit 217, Three-Port Phakonit 219, Anterior Chamber (AC) Stability in Phakonit 219</i>	

- 28. No Anesthesia Sub 1 mm (700 micron) Microincision Cataract Surgery: Microphakonit** 222
Athiya Agarwal, Soosan Jacob, Amar Agarwal
 History 222, Microphakonit (0.7 mm) Needle Tip 222, Microphakonit (0.7 mm) Irrigating Chopper 222, Air Pump and Gas Forced Infusion 223, Bimanual 0.7 mm Irrigation Aspiration System 224, Duet Handles 224, Differences between 0.9 mm and 0.7 mm Sets in Cataract Surgery 224, Technique 225
- 29. 1.8 mm C-MICS with the Stellaris Vision Enhancement System** 227
Terence M Devine
 Why Coaxial Microincision Cataract Surgery (C-MICS)? 227, Fluidics Control 227, Chamber Stability 228, Optimizing Cutting Efficiency 229, Controlling Ultrasound Power 231, Thermal Effects and Corneal Wound Burn 231, 1.8 mm C-MICS Fluidics and Machine Settings 232, 1.8 mm C-MICS Technique 234
- 30. Microcoaxial Phacoemulsification** 236
Vaishali Vasavada, Viraj A Vasavada, Abhay R Vasavada, Shetal M Raj
 Introduction 236, Bimanual Microcoaxial Phacoemulsification (MICS) 236, Conventional Coaxial Phacoemulsification 236, Microincisional Coaxial Phacoemulsification 236, The Microcoaxial Incision 236, Surgical Technique and Instrumentation 237, Intraocular Lens (IOL) Implantation 237

Section 5: Premium IOLs

- 31. Effect of the Shape Factor on the Quality of Images in Eyes Corrected with IOLs** . 245
I Pascual, A Beléndez, L Carretero, A Fimia, R Fuentes, C González, F Mateos, E Villegas
 Introduction 245, Geometry of Intraocular Lenses 245, Classification of Intraocular Lenses 245, Function 246, Materials 246, Power Calculation Formulas 246, Aberrations of Intraocular Lenses 247, Seidel's Theory: Spherical Aberration 248
- 32. Materials for Intraocular Lenses** 257
JM Legeais
 Polymethylmethacrylate and Intraocular Lenses 257, PMMA IOL and Surface Properties 258, Silicone for IOL 260, Soft Acrylic IOL 264, Hydrogel Intraocular Lenses 264, Soft Acrylic IOLs 266
- 33. Premium IOLs** 274
Amar Agarwal
 Introduction 274, Alternate Treatments 274, Surgical Procedure 274, Tips 274, Lenses 274, Nonophthalmols 276
- 34. Correction of Astigmatism with Toric IOL Implants—Practical Aspects** 278
Christopher Khng
 Introduction and Overview 278, Current Toric IOL Models 278, Problems with Toric IOLs 278, Indications for Astigmatism Correction with Toric IOL 278, Toric IOL or Limbal Relaxing Incisions (LRI) 278, Calculation of Toric IOL Power and Placement Axis 279, Surgical Technique for Implantation 279, Combining Toric IOLs 282
- 35. The Multifocal Intraocular Lens** 284
I Howard Fine, Richard S Hoffman, Mark Packer
 Lens Design 284, Clinical Results 284, Patient Selection 284, Preoperative Measurements 285, Surgical Technique 286, Complications Management 286, Postoperative Course 286
- 36. Angle Kappa: The Angle to the Mystery of Multifocal IOLs** 288
Gaurav Prakash, Soosan Jacob, Amar Agarwal
 Introduction 288, What Role Does Angle Kappa Play for the Cataract Surgeon? 288, Multifocal Glued IOL 289, Angle Kappa and Multifocal IOL 289

37. Refractive Cataract Surgery	293
<i>Pandelis A Papadopoulos</i>	
<i>Biometry 293, Ultrasound Biometry 293, Optical Biometry 294, IOLs for the Correction of Presbyopia 294, Monovision with Monofocal IOLs 294</i>	
38. Minimally Invasive Cataract Surgery and MICS IOLs: Our Experience, Our Technique, Our Outcomes	304
<i>Jorge L Alio, P Klonowski</i>	
<i>The Modern Evolution of Cataract Surgery 304</i>	
39. Functional Vision, Wavefront Sensing and Cataract Surgery	317
<i>Mark Packer, I Howard Fine, Richard S Hoffman</i>	
<i>Introduction 317, Spherical Aberration 317, Tecnis IOL 319</i>	
40. The Light Adjustable Lens	321
<i>Richard S Hoffman, I Howard Fine, Mark Packer</i>	
<i>The Ideal Pseudophakic Lens 321, Light Adjustable Lens 321, Modulating Refractive Power 321, Animal Studies 322, Resolution 323, Refractive Lens Exchange 323, Higher Order Aberrations 325, Final Comments 326</i>	

Section 6: Difficult Cases

41. Posterior Polar Cataract	331
<i>Abhay R Vasavada, Shetal M Raj</i>	
<i>Introduction 331, Diagnosis 332</i>	
42. Phaco in Subluxated Cataracts	337
<i>Athiya Agarwal</i>	
<i>Indications 338</i>	
43. Mature Cataracts	345
<i>Amar Agarwal</i>	
<i>Introduction 345, Rhexis in Mature Cataracts 345, Trypan Blue 345</i>	
44. Combined Cataract and Glaucoma Surgery	347
<i>Amar Agarwal, Soosan Jacob</i>	
<i>Introduction 347, Surgical Options 347, Antimetabolites 350, Types of IOL 350, Complications 350</i>	
45. Correcting Astigmatism Through the Use of Limbal Relaxing Incisions	353
<i>Louis D "Skip" Nichamin</i>	
<i>Introduction 353, Limbal Relaxing Incisions 353, The Plan 353, Nomograms 353, Surgical Technique 354, Complications 355</i>	
46. Pediatric Cataract Surgery	358
<i>Rupal H Trivedi, M Edward Wilson</i>	
<i>Introduction 358, Preoperative Considerations 358</i>	
47. Small Pupil Phacoemulsification	378
<i>Amar Agarwal, Soosan Jacob</i>	
<i>Introduction 378, Preoperative Evaluation 378, Pharmacological Mydriasis 379, Intraoperative Procedures Not Involving Sphincter 379, Intraoperative Procedures Involving Sphincter 379, Use of Malyugin Ring for Small Pupil Phacoemulsification 381, Modified Malyugin Ring Iris Expansion Technique 382, Surgical Complications 382, Phacoemulsification Pearls 382</i>	

48. Intraoperative Floppy Iris Syndrome	384
<i>David F Chang</i>	
<i>Clinical Features 384, Clinical and Surgical Management of IFIS 385</i>	
49. Phacoemulsification and Keratoplasty	389
<i>Javier Mendicute, Yolanda Gallego, Aritz Bidaguren, Marta Ubeda, Cristina Irigoyen</i>	
<i>Introduction 389, Indications 390, When to Operate? 391, Combined or Two-stage Procedure? 391, Nine Optical Aids for Improving Visualization 392, Phacoemulsification and Penetrating Keratoplasty 393, Phacoemulsification and Lamellar Techniques 395, Complete Thickness Corneal Opacity 395</i>	
50. Conversion from Phaco to ECCE (Manual Non-phaco Techniques).....	398
<i>Soosan Jacob, Dhivya Ashok Kumar, Amar Agarwal</i>	
<i>Introduction 398, Brunescant and Black Cataracts 398, Morgagnian Cataracts 398, Severe Pseudoexfoliation 398, Zonular Dialysis or Weakness 398, Eyes with Shallow Anterior Chambers 398, Small Pupil with Hard Cataract 398, Phacolytic Glaucoma 399, Bad Endothelial Count 399, Conversion from Phaco 399</i>	
51. Cataract Surgery and Implantation of Intraocular Lenses in Severe Hyperopia	400
<i>Roberto Bellucci</i>	
<i>Introduction 400, Surgical Anatomy of Severely Hyperopic Eyes 400, Phacoemulsification in Severe Hyperopic Eyes 401</i>	
52. Cataract Surgery in the Patient with Uveitis	407
<i>Enrique Chipont, Jorge L Alio</i>	
<i>Introduction 407, Clinical Examination 407, Surgical Indications 407, Preoperative Management 408, Surgery: Phacoemulsification 408, Intraocular Lenses 409, Combined Surgeries 409, Postoperative Treatment 410, Follow-up 411</i>	

Section 7: Complications

53. Posterior Capsular Rupture	415
<i>Dhivya Ashok Kumar, Amar Agarwal</i>	
<i>Introduction 415, Common Risk Factors for Posterior Capsular Rupture (PCR) 415, Steps for Management of PCR 416, Reduce the Parameters 416</i>	
54. Posterior Capsule Rupture and Vitreous Loss	421
<i>Brian Little</i>	
<i>Introduction 421, Preventing Vitreous Loss 421</i>	
55. Intraocular Lens (IOL) as a Scaffold to Prevent Nucleus Drop	426
<i>Dhivya Ashok Kumar, Amar Agarwal</i>	
<i>Introduction 426, Surgical Technique 426</i>	
56. Management of Dropped Nucleus and IOLs	430
<i>Kaladevi Satish, Dhivya Ashok Kumar, Amar Agarwal</i>	
<i>Introduction 430, Dropped Nucleus 430, Indications for Surgery 430, Surgical Techniques 430, Dropped Intraocular Lens 432, Complications and Prevention 436</i>	
57. Posterior Dislocation of Lens Material During Cataract Surgery	438
<i>Steve Charles</i>	
<i>Surgical Psychodynamics 438, Early Recognition and Management of Defects in the Lens Capsule 438, Vitreous Loss 438, Dislocated Lens Material 439, Intraocular Lens Implantation 441</i>	

58. The Malpositioned Intraocular Implant	442
<i>Clement K Chan, Amar Agarwal</i>	
<i>Introduction 442, Management of a Malpositioned IOL 442, Chandelier Illumination 442, Perfluorocarbon Liquids 443, Anterior Chamber Intraocular Lens (ACIOL) 443, Opened Eye or External Approach 444, Closed Eye or Internal Approach—Pars Plana Techniques 444, Temporary Haptic Externalization 444, One-piece Silicone Plate IOL 446, Managing Eyes with Two Intraocular Implants 447</i>	
59. Evaluation of IOL Tilt with Anterior Segment Optical Coherence Tomography	450
<i>Dhivya Ashok Kumar, Amar Agarwal</i>	
<i>Introduction 450, Cases 450</i>	
60. Expulsive Hemorrhage	453
<i>Soosan Jacob, Amar Agarwal</i>	
<i>Introduction 453, Expulsive Hemorrhage 453, Prevention 454, Management 454</i>	
61. Postoperative Inflammation after Cataract Extraction by Phacoemulsification	456
<i>AT Gasch, Chi-Chao Chan</i>	
<i>Introduction 456, Infectious Postoperative Inflammation/Endophthalmitis 456, Noninfectious (Sterile) Postoperative Inflammation/Endophthalmitis 458, Inflammation Due to Surgical Trauma 459, Inflammation Due to Surgical Complications 459, Exacerbation of Pre-existing Uveitis 459, Lens-Induced Uveitis 459, Residual Lens Epithelial Cells 460, Inflammation Related to Intraocular Lenses 460, Miotic Agents 461, Intraocular Solutions 461, Residual Contaminants on Sterilized Instruments 461, Particulate Contaminants 461, Toxic Anterior Segment Syndrome (TASS) 462</i>	
62. Toxic Anterior Segment Syndrome	465
<i>Nick Mamalis, Stanley Fuller</i>	
<i>Introduction 465, Clinical Presentation of TASS 465, Differential Diagnosis 465, Etiology of TASS 466, Treatment 468, Prognosis 468, Outbreak Analysis 469</i>	
63. Pseudophakic Cystoid Macular Edema	471
<i>Carlos F Fernandez, J Fernando Arevalo</i>	
<i>Introduction 471, Histology 471, Pathogenesis 472, Natural History 474, Differential Diagnosis 474, Clinical Presentation 475, High-risk Characteristics for Cystoid Macular Edema 476, Prevention 476, Treatment Options 477</i>	
64. Postoperative Endophthalmitis	482
<i>Clement K Chan</i>	
<i>Incidence and Presentation 482, Causative Organisms 482, Clinical Evaluation and Diagnostic Studies 485, Treatment of Endophthalmitis 488</i>	
65. Delayed Postoperative IOL Opacification	498
<i>Suresh K Pandey, Liliana Werner, Andrea M Izak, David J Apple</i>	
<i>Introduction 498, Opacification of Foldable Hydrophilic Acrylic Lenses 501, Prevention and Treatment 507</i>	
66. Explanting a Posterior Chamber Intraocular Lens	510
<i>Thomas A Oetting</i>	
<i>Introduction 510, Indications for IOL Explantation 510</i>	
67. Posterior Capsular Opacification	516
<i>Suresh K Pandey, Liliana Werner, David J Apple, Andrea M Izak</i>	
<i>Introduction 516, Background 516, Clinical Manifestations and Treatment 519</i>	

Section 8: IOL Implantation in Eyes Without a Capsule

xxviii

- 68. Sutured Scleral Fixated IOL** 535
Amar Agarwal, Soosan Jacob
Introduction 535, Surgical Technique 535, Complications 536
- 69. Iris Suture Fixation of Intraocular Lenses** 538
Roger F Steinert
Principles 538
- 70. Sutureless Posterior Chamber IOL Fixation with Intrasceral Haptic Fixation** 541
Gabor B Scharioth
Introduction 541, Surgical Technique 541
- 71. Glued PC IOL Implantation with Intralamellar Scleral Tuck in Eyes with Deficient Capsule** 545
Dhivya Ashok Kumar, Amar Agarwal
Introduction 545, Surgical Technique 545

Section 9: Miscellaneous

- 72. Femtosecond Laser-Assisted Refractive Cataract Surgery** 559
Glauco Reggiani Mello, Jonathan H Talamo, Ronald R Krueger
Limitations of Manual Cataract Surgery 559, Femtosecond Laser Technology 559, Systems Available 560, Procedure 561, Astigmatic Correction 563, Complications, Risks and Limitations 564, Economics 565
- 73. Use of High-Definition 3D Visual Systems in Cataract Surgery** 566
Robert J Weinstock
The Truevision® 3D HD System 566, The Truevision® Cataract and Refractive Toolset Software 567
- 74. A New Sulcus Implanted Mirror Telescopic IOL for Age-related Macular Diseases and Other Macular Disorders: The LMI-SI (ORILENS®)** 569
Soosan Jacob, Issac Lipshitz, Amar Agarwal
Introduction 569, LMI-SI (ORILENS®) 569, Preoperative Evaluation 569, Surgery for Implanting the LMI-SI (ORILENS®) 569, Results 571, Advantages of the LMI-SI 571, Financial Disclosures 571
- Index* 573
